

## **HOLIDAY'S HOMEWORK**

**SESSION – 2026-2027**

**CLASS -XI (BIOLOGY)**

### **General instructions:**

- 1. Learn chapter 1 for class test**
- 2. Complete your notes register.**
- 3. Do one project based on any topic from your NCERT book.**
- 4. Do the following assignment in your assignment register.**

**I Write down the scientific names of 20 different plants and animals around you in your register.**

**II Biology in daily life journal – Maintain a 7 day diary noting where biology is used such as food, medicine , environment etc. Keep entries short and practical ( To be done in a scrap book). Also record the latest inventions or discoveries made in the Biology.**

**III Research various Biology careers and explain any three of your choice which should include required skills, courses available and their future scope in India ( To be done in the Biology registers).**

**IV Make a beautiful and creative poster on half cartridge sheet from any one topics given below**

- 1) Life style diseases in teenagers (Obesity and diabetes)**
- 2) Antibiotic resistance: A growing threat**
- 3) AI in Biology and healthcare**
- 4) Waste to wealth**
- 5) Role of students in reducing carbon foot prints**

### **V ASSIGNMENT BASED ON CHAPTER 1**

Q1. At the sleeping time, Rita's mother went to the kitchen and took small spoon of curd and added to the milk in the big bowl. Rita was amazed to see this and asked her mother for the possible reason for the same.

- i) What value did Rita reflect in her reasoning?**

- ii) Why did Rita's mother add curd to the milk?
- iii) Which bacteria used to be present in the curd?
- iv) Name any harmful bacteria?

Q2. Anuradha while throwing away the stale outdated bread noticed green and black patches on it she took the stale bread in her college laboratory and observed it under the microscope.

- i) What might have she observed under the microscope?
- ii) What name has to be given for her observed structure?
- iii) Would you place this structure under plants or animal?
- iv) What values are associated with her observation?

Q3. Ramesh during his visit to Mussorie, he found bushy branched structure on the bark of tree and rocks. He took the sample of this bushy structure and showed it to his teacher for identification.

- i) What was that bushy branched structure?
- ii) What is the composition of this structure and role of each?
- iii) What utility is associated with this?

Q4. *Brassica Campestris* linn

- a. Give the common name of the plant.
- b. What do the first two parts of the name denote?
- c. Why are they written in italics?
- d. What is the meaning of linn written at the end of the name?

Q5. Brinjal and potato belong to the same genus solanum, but to two different species. What defines them as separate species?

Q6. What is the similarity and dissimilarity between "whole moong daal" and "broken moong daal" in terms of respiration and growth? Based on these parameters classify them into living of nonliving?

Q7. What is the principle underlying the use of cyanobacteria in agricultural fields for crop improvement?

Q8. How is the 5 kingdom classification advantageous over the 2 kingdom classification?

Q10. The common name of pea is simpler than its botanical (scientific) name *pisum sativum*. Why then is the simpler common name not used instead of the complex scientific/botanical name in biology?
